LEADERSHIP+ COMPLEXITY

ONE DAY LEADERSHIP SYMPOSIUM
6 SEPTEMBER 2019

"We've got 21st century technology and speed colliding head-on with 20th and 19th century institutions, rules and cultures." – Amory Lovins

In our professional and personal lives we are experiencing:

- Greater volatility, uncertainty and interconnectedness
- An unprecedented pace of change that is less predictable and creating unique situations
- Threats and opportunities converging and influencing each other

So, in response for 2019 we have created a one-day symposium designed to inspire greater Tasmanian leadership: 10 hours of amazing speakers extraordinary networking opportunities and profound connections.

Designed by Tasmanians for Tasmanians, this symposium actively explores the reality that leadership is a dynamic process increasingly hampered by complexity, interconnectedness, and unprecedented speeds of change.

Featuring a mix of keynote speakers, panels and practical workshops we aim to build capacity and momentum for positive change in Tasmania. To do this we will deepen your knowledge and broaden your capacity so you can enjoy greater personal and professional success.

THE OPPORTUNITY

This is an action-packed day designed for leaders at every level. We acknowledge leadership in the Tasmanian community in all its many forms. Whatever your role or ambitions we will shape your ability to create and deliver change across complex and interconnected systems.

THE EXPERIENCE

This is an exceptional opportunity to hear from a number of local and interstate experts, who will:

- Accelerate your strategic thinking and capacity as it relates to complexity
- Build on your leadership strengths and help you gain clarity amidst the chaos
- Give you skills to build collaborative relationship across dynamic systems
- Increase your ability to problem solve and lead positive and permanent change
- Expand your networks, and
- Be inspired!
